

The Police Treatment Centres

A Force for Promoting & Improving Health & Wellbeing

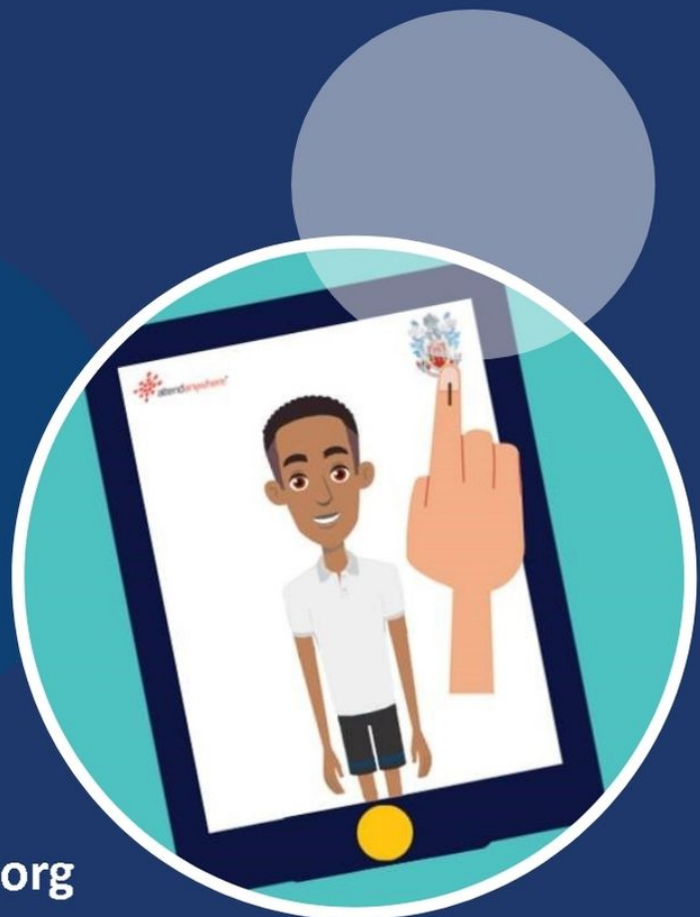

Remote Physiotherapy Outpatients

Sometimes, it would be easier to access our class leading treatment remotely. That's exactly what we are making available.

Attend Anywhere technology is giving us new ways to provide our donors with access to our expert clinical teams, from the comfort and convenience of your own home. Our new Remote Physiotherapy Outpatient Service will supplement our established residential treatment.

The secure, online service enables you to attend video appointments with your clinician without the need to attend the Centres on a residential basis. This is ideal for donors who would find it hard to travel or who have dependents making a residential stay difficult.

This is an additional resource to our residential treatment and not intended as a replacement for NHS services or Occupational Health.
